**C. It is important to understand the difference between Occurrence Coverage and Claims-Made coverage.**

**1. Occurrence Coverage:**

I understand that occurrence coverage will respond to incidents that occur during the policy period without any consideration for the date a claim is filed with the insurance company.

\_\_\_\_\_  
Initial here

**2. Claims-Made Coverage:**

I understand that claims-made coverage will respond to incidents that take place on or after the prior acts date ("retroactive date") of the policy and which are reported to the insurance company during the policy period. Claims-made coverage involves a step process with the premium increases over the first five years of coverage following the retroactive date in increments proportional to the claims reporting for that experience. The initial premium and subsequent years' premium are lower than an occurrence policy. However, as of the fifth year the claims made premium reaches a mature level and premium adjustments are based on annual rate changes only. If coverage is discontinued, a Reporting Endorsement ("Tail Coverage") must be purchased to provide coverage for claims which may have occurred but have not yet been reported.
